

# Program is not coming up in search result

## Issue:

We love when organizations register on our platform because this means you've made the first step towards getting yourself out there - that's awesome! Unfortunately, we have also noticed that some organizations do not have programs registered with us so, when you use the search function, you do not show up on the results page.

## Solution:

In this situation, when you input your postal code or location in our search bar to verify if your organization shows up for mentoring opportunities, please note that it will not show up because the search function is only linked to programs and not organizations.

We strongly recommend following this link < [Submit a Program](#) > and creating a program for your organization if you have not done this yet.

Alternatively, if you have registered a program and its approval status is still pending, your program will not come up in the search results as it only shows once the program has been approved.
